SOFTWARE ENGINEER | MS DATA SCIENCE STUDENT | DATA ANALYST | POWER BI

SUMMARY

Computer Science graduate and current M.S. Data Science student at Lebanese American University (LAU) with professional experience in software engineering, data analysis, business intelligence, and data visualization. Currently working full-time as a Software Engineer at Technosoft after successfully completing a software development internship with the company. Skilled in Python, SQL, Power BI, Pandas, machine learning, and web technologies, with experience transforming data into actionable insights and developing production software solutions.

EXPERIENCE

Software Engineer | Technosoft *2026 – Present*

- Develop and maintain software solutions for engineering and industrial applications.
- Implement and improve production software using object-oriented programming and structured development practices.
- Debug, test, and troubleshoot application issues to improve reliability, performance, and usability.
- Collaborate with software and engineering teams to deliver features and solve technical problems.

Software Development Intern | Technosoft *2026*

- Analyzed application data and system performance to support development decisions.
- Assisted in debugging and testing software using structured analytical methods.
- Collaborated with developers to improve software quality through data-driven problem solving.
- Applied object-oriented programming principles in enterprise software projects.
- Successfully completed the internship and transitioned into a full-time Software Engineer position.

SELECTED PROJECTS

GAIA - Intelligent Health Symptom Checker Website | *Final Year Project*

- Designed and developed a full-stack healthcare platform supporting web and mobile users.
- Built responsive user interfaces and role-based dashboards for patients, doctors, and administrators.
- Developed REST APIs using FastAPI and integrated PostgreSQL databases using SQLAlchemy.
- Implemented authentication, appointment booking, messaging, health tracking, and PDF reporting systems.
- Deployed production services using Render, Vercel, and Supabase cloud infrastructure.

Vizu - Full-Stack Video Streaming Website

- Developed a YouTube-style web platform using Laravel.
- Implemented user authentication and account management, video upload, playback, and content management features.

Lebanon Short-Stay Market Scraping and Analysis

- Scraped thousands of rental listings using Selenium and cleaned datasets using Pandas.
- Performed exploratory analysis to identify pricing, occupancy, and market trends.
- Built interactive dashboards to visualize regional performance, pricing distribution, and market insights.
- Generated data-driven recommendations through statistical analysis and visualization.

TECHNICAL SKILLS

- Python (NumPy, Pandas)
- ML: Scikit-learn, NLP
- Tools: Git, GitHub, Vercel, Render
- HTML5, CSS3, JavaScript, Bootstrap, PHP, Java
- WordPress, Responsive Design, Elementor
- FastAPI, PostgreSQL, MySQL, SQLAlchemy
- Object-Oriented Programming
- Database Design
- Power BI (DAX and Data Processing)

CERTIFICATIONS

Complete Data Science Bootcamp | Udemy

Leetcode Bootcamp | Rafik Hariri University

EDUCATION

Lebanese American University (LAU) | 2026 – Present
Master of Science in Data Science
Graduate Assistantship Recipient

Rafik Hariri University | 2023 – 2026
Bachelor of Science in Computer Science

- GPA: 88 / 100
- President's Honor List
- Dean's Honor List (x5)

RELEVANT COURSES

- Machine Learning and Data Mining
- Data Science and Web Scraping
- Database Management Systems
- Advanced Web Programming
